

Dealeley

Environmental Protection
of Property and Product

Our History

- Dealey Group was founded in 1954 by the great Dr Dealey, he began with resources including a wire haired terrier, a beaten up Rolls Royce and an enormous knowledge of insects.
- So far the Dealey fleet has grown to sixteen highly equipped vehicles and the service portfolio has grown from its origins in commodity care to include fumigation, pest control, falconry, instrumentation and artifact preservation.
- We look forward to working with you soon.

Environmental Protection
of Property and Product

- Founded in 1954
- An independent, family owned business
- We are an enthusiastic, talented, highly trained team of professionals
- A team of fumigators
- A team of pest controllers
- A team of bird controllers
- Everyone has their speciality
- We are based in sunny Suffolk but cover the whole of the UK
- We have unrivalled insect control ability and our recent purchase of other pest control companies has further bolstered our pest control team

CRRU

The Campaign For Responsible Rodenticide Use
We are CRRU Compliant... Are you?

PEST CONTROL

Did you know that traditional pest control is extremely damaging to the environment?
We have a different approach...

Fewer Toxic Chemicals On Site			A focus on habitat management
Pest control measures which are safer for your workforce			Rodent proofing buildings
Pest control measures which are safer for the environment			Highly effective programmes for creating a pest free site

At the beginning of a Dealey contract you will be issued with a Certificate indicating that you are CRRU compliant.

Animals at risk from traditional pest control:

Barn Owl

Kestrel

Harvest Mouse

Hedgehog

Stoat

PEST CONTROL

SERVICE CONTRACTS

 - Trend analysis routinely carried out
 - Optional barcoding of monitors and e-reporting
- CRRU Compliant, BRC Compliant, Supermarket auditable, TASC compliant, AIB compliant. We can work to any audit standard.

INSECTICIDAL TREATMENTS

Most pest control companies just have a man with a 5L sprayer to address insect issues. We have a vast array of tools for insect control that ensure that treatments are effective immediately.

- Thermal fogger vs moths
- Silica Dioxide vs mite
- Powered mists vs all insects
- Co2 snow vs everything

Heat treatments

Used against insects such as bed bugs, woodworm and clothes moths. This is a seriously green method of pest control that uses no insecticides at all.

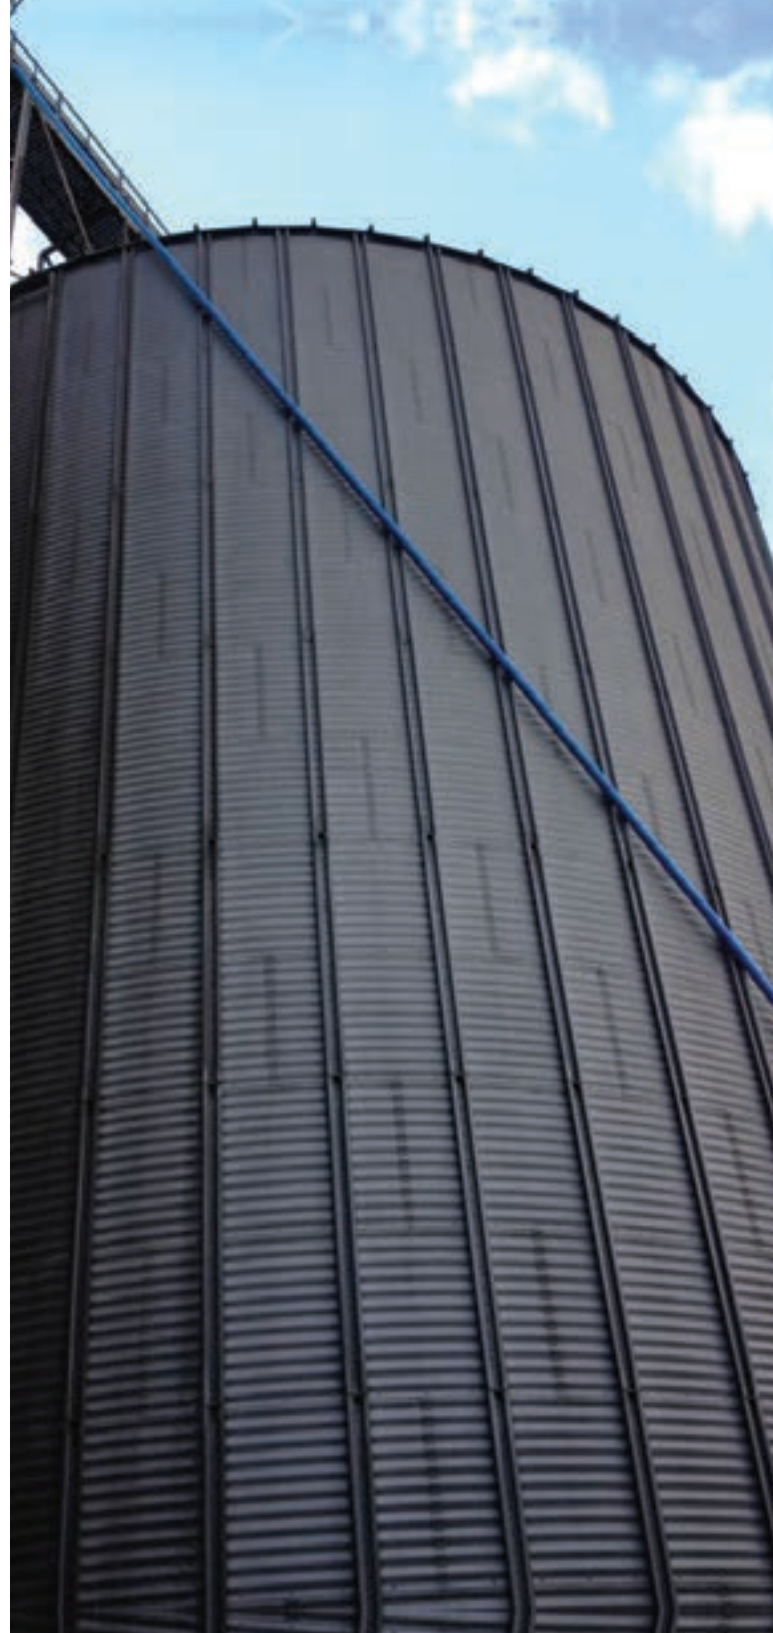

Fumigation

- One of the few companies in the UK licensed to use toxic gas for pest control. These guys are seriously highly trained.
- Fumigation is toxic to all life stages of insects.
- It is the only pest control solution that is 100% effective.
- It is the only pest control solution that is penetrative.
- The natural choice for anyone dealing in commodities.

WE CAN FUMIGATE

Bulk grain, feed and food products, Shipping containers, Ships, Artifacts, Wood, Mills, Building materials, Organic produce, Textiles.

FALCONRY

- 3-2-1 service designed to keep pest birds completely away from a site
- A permanent solution for bird control based on fear, not fatalities

BIRD CONTROL THROUGH PROOFING

- Proofing solutions
- Netting
- Spiking
- Shock tracks
- Laser repelling

- Autonomic laser repelling
- Optical gels

All IPAF trained technicians with a head for heights
